AES 20000 WATER TRUCK

TANK CAPACITIES

- 20,000 litres

TANK FITTINGS

- Top fill point interchangeable funnel, front, middle and rear fill hatches, front access ladder, site level gauges front and rear
- Full handrails around top of tank to meet AS1657-1992 standards
- Fold down design for transport
- Ground level "On Highway" drain point on drivers side of tank

PUMP SYSTEM

- Hydraulic driven 3" high lift water pump with three fan sprays
- Pressure outlets include 1" and 2" ball valve outlets for hose reel and additional pressurised outlet

FAN SPRAYS

- Three magnum air operated spray heads
- One left, one right and one central as standard – additional rear and front sprays are available
- All individually controlled from inside the cabin

DRIBBLE BAR

- 125mm (5") full width type with air operated butterfly valve controlled from inside the cabin

OTHER PIPING

- 150mm (6") quick dump pipe and valve from ground level to rear of the tank
- Tank comes with a 100mm (4") ground level fill point fitted with a butterfly valve and male camlock for hose connection
- All pipework is sandblasted and galvanised to reduce corrosion and maximise the life span

CANNON

- Air operated, mounted in rear right hand corner at the top of the tank - remote controlled from inside the cabin

HOSE REEL

- Graco spring rewind complete with 15m x 25mm hose and variable spray water faucet

BUMPER

- Full width bumper incorporating LED tail lights and clearance lights

ELECTRICAL

- LED lights top rear corners of tank
- Reverse alarm and reverse light fitted
- Hella amber beacon mounted on cab roof – additional rear beacon available
- 24 volt work lights fitted to the rear work area
- 2 x emergency stops fitted, 1 x cab/dash mounted and 1x tank mounted
- Battery isolator and 24V jumpstart receptacle fitted
- UHF 2 way radio

CAB CONTROLS

- All operations are controlled from the centre console mounted control box

FIRE EXTINGUISHERS

- 2 x 9kg extinguishers supplied, 1 mounted behind the passenger side of cab and 1 at the rear of the tank

TANK PAINTING

- Tank and all components sandblasted to class 2½
- Tank internals lined with a two pack epoxy certified for potable water
- External tank finished with two pack paint with hand rails and access ladders painted with ASY14 yellow

REVERSING CAMERA

- Camera is fitted to the rear of the tank with the dash 7" mounted colour monitor (Audible Model)

OPTIONS

- 2 x additional cab controlled rear spray heads
- Additional rear mounted beacon
- Turbo timer
- Wrap around bull horn extensions for dribble bar
- VHF radio supplied and fitted
- Aluminium bull bar
- 6 point front spring manual grease system
- Front mounted heavy duty stainless steel toolbox
- Big Mate GPS system
